About: The award-winning Peter Treistman Center for New Media, managed by Fine Arts Technology, is considered the “hub” of arts/technology research in the College of Fine Arts as well as the center of support for the various “distributed” research projects around the College. The Treistman Center, established in 1993 and named for the late Media Arts Professor Peter Treistman, is head-quartered in the Music Building, Room 137, in the Fine Arts Complex. It contains 1,200 square feet of reconfigurable space for faculty research projects that utilize the lab computer systems and other high-end equipment primarily involved with human/computer interaction, sensory representation and intelligent systems. A professional administrative and production staff is on hand to assist with projects.
